Dollars Raised:  
**\$74,870**

Total Number of IEC Members:  
**4,031** 5.99% Growth from 2022

**+ We are IEC**  
Established in 1957, Independent Electrical Contractors (IEC) is a trade association with more than 4,000 member businesses that employ over 100,000 electrical and systems workers nationwide and are responsible for over \$10B in gross revenue annually. IEC educates nearly 16,000 electricians and systems professionals each year through world-class training programs at 53 educational campuses and affiliate local chapters across the country. IEC is the premier national trade association for merit shop contractors in the electrical, renewable energy, solar, low voltage, and systems automation industry. IEC serves our membership by providing workforce development solutions to electrical contractors and electricians, including apprentice recruitment, career-long training, employee retention strategies, and insights on new tools and technologies to maximize productivity. Delivering programs that support the entire career of an electrician, IEC delivers the core training, certification, advocacy, codes and safety standards, and peer-to-peer networking opportunities to ensure IEC members are equipped with a qualified workforce and positioned for long-term success.
